

Glass Fiber Yarn

Code:KXT GF201

Description

Kaxite is a specialized manufacturer and exporter on E/C Glass fiber Texturized Yarn, Glass fiber Texturized Yarn with Wire, Glass fiber Roving, Glass fiber Twisted Roving, Glass fiber Yarn Twisted with Copper Wire, Glass fiber Sewing Yarn, etc.

Glass Fiber Yarn

Item no.:KXT GF201

Kaxite is a specialized manufacturer and exporter on E/C Glass fiber Texturized Yarn, Glass fiber Texturized Yarn with Wire, Glass fiber Roving, Glass fiber Twisted Roving, Glass fiber Yarn Twisted with Copper Wire, Glass fiber Sewing Yarn, etc.

Item no.:KXT GF201

Range of Glass Fiber Yarn

Code	Name	Photo	Description
GF2011	Glass Fiber Texturized Yarn		1.It is produced by texturizing process with high pressure air. 2.It has high strength; 3.Used for keeping the insulating material warm, insulating against heat, can make other products. 4.Excellent substitute for asbestos. 5.GF2011-I Texturized glass fiber yarn with metallic wire.
GF2012	Glass fiber Roving		1.The roving glass fiber is the most basic type in the material of glass fiber reinforced plastic. 2.It has good insulation and heat resistance. 3.Used for making glass fiber roving cloth, texturized yarn and chopping reinforcement.
GF2013	Glass fiber Twisted Roving		1.Similar as GF2012. 2.For making texturized yarn and glass fiber fabric.
GF2014	Glass fiber Yarn Twisted with Copper Wire		1.Glass fiber yarn twisted with copper wire wrapped by cotton and chopped strands. 2.Used to make brake, clutch, etc.
